Governor George Clinton Papers, Vol II

Page 423

This day personally appeared before me one of the Justices of the Peace, Hendrick Mattheis, who being duly sworn on the Holy Evangelist of Almighty God, deposed and saith — that his Son in Law David Brass had wrote a letter to his Wife wherein he tells her, that he is in a good place, that she must have good Courage, and she should not go further from her father's house than to Migsheel Brown & further said that one Howard Told last Thursday, that the Enemy was within two hours travel from his house, and he might them if he choosed; and That the people from Fishkill to Harpersfield had laid down their arms — and said Mattheis further said that Hannes Kneeskern told him, that all the Tories that were gone from Schoharie were all with the Enemy except Nicholas & Philip Freymeyger; those were with Butler, and that Frederick Bouks wife told him this morning, that next Saturday the Enemy would attack Schoharie, and that the Enemy laid ~~no~~ further than what he could go and come back in a day and a half.

DEPARTMENT OF VETERANS AFFAIRS

MEMORANDUM:

Lieut. David Brass

K. R. R. N. Y. (Pap. & Rec. xxvii p. 296)

P. 296 Maj. Ross to Matthews Aug 17 1783 Cataragui.

"There is an officer of the Rangers, at Niagara of the name of Brass (*Lieut. David Brass of Butler's Rangers, who built the first mills on the Four Mile Creek at Niagara) of a remarkable genius, (perhaps as any in America) an exceeding good Millwright and a most useful man in Colonization, he was some time in garrison at Oswego on our first arrival there, and I was much oblig'd to him for his advice and assistance in many things. Should his Excellency think proper to encourage I think from his universal knowledge and good Character his Majesties Service here would Reap the greatest advantage — When I received His Excellency's directions concerning the Mill to be built here, I took the liberty before I left Oswego to apply to Coll. Butler for a visit from Lieut. Brass but he was so much employed that he could not then be spared. I ^{am} still in the predicament which I mentioned in my last, having no person on the Ground who understands that Business —

P. 297. Cataragui 29th Aug., 1783 Ross to Matthews.

"I was favored with a visit from Lt. Brass from Niagara he has made a model of the Saw Mill and as His Excellency directs, the First Mill will be begun upon soon, but will now await the arrival of the Millwright.

"I was anxious to know the quality of the land contiguous to this Place, hearing before I had the honor of your letter, that there was a probability of making a settlement for Loyalists. Mr. Brass did me the favor to make a 7

The first part of the paper discusses the importance of the study of the history of the United States. It begins by stating that the purpose of the study is to provide a comprehensive overview of the country's development from its early years to the present day. The author emphasizes that understanding the past is essential for grasping the complexities of the current situation.

In the second section, the author delves into the political landscape of the United States. He examines the role of the federal government and the states, as well as the influence of various interest groups. The discussion highlights the challenges faced by the political system and offers suggestions for reform.

The third part of the paper focuses on the economic aspects of the United States. The author analyzes the growth of the economy over time, noting both successes and failures. He also addresses issues such as inflation, unemployment, and income inequality, providing insights into their causes and potential solutions.

Finally, the fourth section explores the social and cultural dimensions of the United States. The author discusses the impact of immigration, urbanization, and technological change on society. He concludes by reflecting on the future of the nation, expressing optimism about its potential while acknowledging the need for continued effort and vigilance.

History of the people of the world is a science in 1" of the world and the world is a science in 1" of the world.

Lieut David Brass

2

(cont'd) K.R.R.N.Y.

Went for three days from Point Henry down to the River and brought me a very unfavourable Report of its quality for ten Mills down the River, but afterwards it had a good appearance and believe continues so almost all the way to Canada. I sent him out a Second time in Company with Capt. Crawford, when on their Return they brought me a very flattering Report. The good land began about two miles from this Fort up the Lake and in a Semicircle Round it and which they declare is not inferior to the best of the Mohawk Country. I have the honor to enclose you their Report accordingly.

"The Millstones and Iron work Coming here without any directions I concluded they were intended for this place Lt. Brass now takes them here for Niagara he says Bolting Cloth was also expected and wanted there.

P. 303 Ross to Mathews Cataraqui 3rd Nov., 1783

"I was in hopes the Saw mills would have been finish'd this fall, which the badness of the Weather has in some measure prevented. Lieut. Brass not being particularly wanted after the arrival of the men sent by Lieut. Lewis I have not taken the liberty to write for him, especially as there are so many people employ'd here at present.

P. 309 Ross to Mathews 17th Feb. 1784 Cataraqui.

"Since I had the honor to write you last every attention has been paid to carry on the various works directed by his Excellency. The winter has been uncommonly severe and the frequent falls of snow have in some measure retarded our operations, but as the Weather now moderates and the days grow longer Work will go on rapidly, amongst

Lieut. David Brass

3

(cont'd) K. R. R. N. Y.

other things, one Saw mill and preparations for another will be accomplished before the settlers can arrive; a Grist mill is also ready to be put up as soon as the Weather will permit which together with the Saw mill on the same stream will go on in the severest Season.

P. 311 Ross to Haldimand, Cataraqui 14th June, 1784.

"The Saw Mill is a very good one, but an expensive job, and (has) taken much longer time building than what Mr. Brass of the Rangers told me was necessary. I believe the man employed on the occasion to be a very good artificer himself, but perhaps has not that influence or command over the workmen which Mr. Brass is said to have. He says he only agreed with Capt. Lewis to build one Saw mill and one Grist Mill, wherefore I have sent for Mr. Brass (agreeable to your Excellency's directions in a former letter) and if he comes his expeditious method in building mills will I hope, not only be a great saving to Government, but very beneficial to the new Settlement.

P. 312 Cataraqui 14th June 1784

Report of the several works that has been completed and in hand during the winter.

Saw Mill Complete.

Grist Mill now in hand and somewhat advanced.

P. 313 Major Ross to Major Mathews Cataraqui 7 July 1784.

----- Lt. Brass has been here but returned for his Family to Niagara, he on his return here will expedite the Saw mills and from whose assiduity great Success may be expected.

(cont'd) K.R.R.N.Y.

P. 315 Calatagan 29th September 1784. Ross to Mathews

----- The Weather has been very bad of late which has somewhat hindered the progress of the sawmill of the Bay of Quinley, and the best of the workmen would not quit their land, however it will soon be done, that Mill is most commodiously situated and easily supply'd with timber down the very stream that turns it. As the work will soon be over and the Department nearly reduced to the Overseers, and the winter approaches fast if any reduction is to take place amongst them, I should be glad to be honored with your Excellency's Commands.
